

American Truck and Rail Audits, Inc.

August 2015 Brain Teaser

Q

You have three boxes of fruit. One contains just apples, one contains just oranges, and one contains a mixture of both. Each box is labeled – one says “apples,” one says “oranges,” and one says “apples and oranges.” However, it is known that none of the boxes are labeled correctly.

How can you label the boxes correctly if you are only allowed to take and look at just one piece of fruit from just one of the boxes?
