

American Truck and Rail Audits, Inc.

July 2016 Brain Teaser

Bad Shipping:

Five (5) guys who live in apartments made orders from the same company.

Unfortunately, the shipping company delivered every order to the wrong apartment.

- Roger, who doesn't live in an end apartment, ordered the television set.
- Tom lives next door to the man who received the dishware.
- Mr. Weiseman, who didn't receive the auto tools, lives two apartments from the man who ordered the downhill skis, and one apartment from Harry.
- Ed, whose last name isn't Smith, lives in apartment #3, didn't receive the auto tools.
- Mr. Smith, who doesn't live in apartment #4, ordered the golf clubs but he received the item that Mr. Campbell ordered, which wasn't downhill skis.
- The bachelor in apartment #1, which isn't Tom, ordered what Al received.
- The man in apartment #2, who didn't receive the golf clubs, lives next door to where his order was delivered.
- Mr. Bates didn't order the downhill skis.
- The television set was not delivered to Ed's apartment.
- Tom lives in apartment #5.
- Nothing is known about Mr. Harper.

What did Mr. Bates receive?

Auto Tools? Dishware? Downhill Skis? Golf Clubs? Television Set?

*HINT: You need to draw out a grid and fill in the various bits and then go back and check the questions each time to see if you can make progress. You have to remember that no one received what they ordered.
