

## Thinking Outside the Box

Children between 4 and 6 years old can often solve this problem in less than 5 minutes.  
Can you?

$$8898=7 \quad 7774=0$$

$$1203=1 \quad 1003=2$$

$$4566=2 \quad 9856=4$$

$$5464=1 \quad 8764=3$$

$$4500=?$$
